Hi Brian

I found the drawings we have in PDF. One of them shows the fan but I do not have the sheet with the information on the fan. Stephen's refrigeration contractor's license # is RC012842. Stahlman Engineering did all of the design work the original installation and the 2003 addition. The company was purchased by the Design Group.

Things have been upgraded at the facility since 2003. A new control system with remote access was installed in 2007. The original Armstrong Purger was replaced with a Hansen AutoPurger in 2009. A new ammonia detection system was installed and incorporated into the control system to provide ammonia detection in all of the refrigerated spaces, the engine room and relief vent line in 2010.
